- * Adjustable 2-line x 24-character Liquid Crystal Display
- * Compatible with M622 Expansion Module
- * Visual Ringing Indicator
- * Multiple Language Presentation
- * Call Timer

Building success with the business telephone leader

In today's world, sometimes style can replace substance. That's not the case with the Meridian® 6320 from Aastra Telecom. This digital Centrex telephone is a powerful performer loaded with features designed to get the most out of the digital Centrex environment.

The set supports multiple line functionality using only a single connection and provides automatic prime line selection.

The 13 programmable feature keys provide maximum programming flexibility and can be set up as either line keys or feature keys. Customize the phone to use the keys as single button access to Centrex features or assign them to Multiple Appearance Directory Numbers (MADN). Feature key status is shown via the LCD indicators beside each key.

The unique combination of both dual headset ports and the built in handsfree speakerphone puts the Meridian® 6320 in a class by itself. The dual headset ports (the second port designed for listening in on calls) are ideal for a call center operation. The enhanced speakerphone provides excellent sound quality and allows the telephone to be right at home in an office environment.

The flexibility of the M6320 is further enhanced by its compatibility with the M622 expansion unit. By adding one or two M622 modules, the Meridian® 6320 transforms itself into a low cost "mini-console". This makes it the ideal receptionist phone for busy departments.

Performance, flexibility and loaded with features too numerous to mention, the Meridian® 6320 is the future of digital Centrex communication terminals.
