

# IP 705

## IP Telephone

**The IP 705 is a standard IP Phone designed exclusively for AltiGen IP Phone Systems.** The IP 705 provides a subset of the flagship IP 710 VoIP telephone's features while offering the same level of voice quality at a reduced price.

Users have convenient single button access to voicemail, call conferencing, call transferring, redial and call log lists.

With the 2 line liquid crystal display the IP 705 is capable of displaying time, Caller ID name or number, and do-not-disturb and call forwarding status.

**Customizing the IP 705.** You can personalize the IP 705 with 5 backlit user-defined keys. These programmable keys can be setup for any combination of configurable features like, but not limited to, speed-dialing, extension busy/ringing appearances, call appearances and line appearances.

The IP 705 also supports 3rd party hands free headsets using AltiGen's amplified industry standard RJ9 headset port.

AltiGen also provides you with 7 combined traditional and melodic ring tones which can also be assigned to call, line, and extension appearances on the programmable keys.

### **Productivity Features:**

- ▶ One button access for voice recording to your personal voicemail box or to a centralized server
- ▶ One button access to voicemail
- ▶ 5 user programmable keys for extension, call and line appearances, access to feature codes, and speed dialing
- ▶ Auto answer feature allows calls to be answered automatically to a defined voice device within a specific ring time. Great for call center service agents with headsets or office operators
- ▶ Optional Power over Ethernet (PoE) support

***"The available feature set on the IP 705 VoIP telephone brings tremendous value to the table."***

John Babin  
Capture Technologies, Oakland CA

## IP 705 Phone Features:

Part No. ALTI-IP705

### One-touch feature buttons:

- ▶ Redial
- ▶ Hang-up/Release
- ▶ Hold
- ▶ Speaker
- ▶ Mute
- ▶ Flash
- ▶ Transfer
- ▶ Conference
- ▶ Speaker
- ▶ Voicemail
