

Customer Premise Equipment (CPE) Avaya & Altigen IP PBX

Overview

Whether you are a small business wanting a big business image, or a larger business with the desire to increase employee productivity and reduce cost, GTA can assist you in achieving your business goals. GTA offers innovative IP telephony solutions such as **Avaya** and **Altigen** IP PBX systems. They are readily scalable and it efficiently serves the needs of small, medium and large enterprises. Both IP PBX systems are proven, resilient converged communication platforms that add rich IP telephony and advanced user applications to your employees whether they choose to operate on site, away from your office to meet the needs of you customer.

GTA is an authorized reseller of the industry leading Avaya PBX Equipment. The Avaya system delivers Intelligent Communications solutions that help companies gain the advantage needed in a competitive marketplace. Avaya continues to lead the global market in IP PBX technologies with more than one million businesses worldwide, including more than 90 percent of the FORTUNE 500® using Avaya solutions for IP Telephony, Unified Communications, Contact Centers and Communications-Enabled Business Processes. Avaya's customers range from small, medium, large, and enterprise businesses and offer a wide selection of desk phones, mobile devices and mobile applications.

GTA is an authorized reseller of the Altigen IP PBX system. Altigen telephone systems are a next generation IP PBX that offers superior functionality and low cost of ownership to small to mid-sized businesses. The Altigen IP PBX includes VOIP (Voice over IP), a superior PBX and voice mail, robust auto attendants, automatic call distribution, integrated contact center, built in email server, mixed media messaging, LAN and VOIP. Altigen telephone systems provide time-tested reliability with over 12,000 installed worldwide.
