**Re: Tariff Transmittal No. 18  
General Exchange Tariff No. 1  
Introduction of New Service**

GTA Telecom LLC d/b/a GTA ("GTA") files this Tariff for the introduction of a new product and revised pages

- Section 5, Original Page No(s). 64 and 65

GTA respectfully submits this Tariff Transmittal for the introduction of Fractional Primary Rate Interface - Integrated Services Digital Network (FPRI) as an enhancement to the current product Primary Rate Integrated Services Digital Network (ISDN) offering. Currently a Primary Rate ISDN service is offered on a 24 channel (23-B channels used to carry digital voice traffic and/or data messages and 1-D channel which carries information used to control the PRI channels) basis. GTA introduces the FPRI to allow business customers flexibility to purchase B channels in smaller increments beginning at 6-B channels and 1-D channel up to 23-B channels and 1-D channel.

In accordance with 12 GCA § the notice provisions of Section 12106(b) of the Guam Telecom Act, GTA requests that the Commission approve this filing to be effective 30 days hence, on November 5, 2011. An original and one (1) copy of the tariff revisions is enclosed.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "Eric N. Votaw".

C. Rate Regulations

1. Rate Categories

For the purpose of ordering, there are three categories for ISDN Services. These are:

Service Designator Codes

Basic Rate Interface	BRI
Fractional Primary Rate Interface	FPRI
Primary Rate Interface	PRI

Each service consists of a basic channel to which Customer Premises Equipment Interface(s) are added by the customer. Separate business and residential rates are offered for Basic Rate Interface Services.

Primary Interface service may be obtained in 2 types of service. Fractional Primary increments is ordered with a minimum 6 B-Channels and 1 D-Channel) or a full Primary Rate Interface (23 B-Channels and 1 D-Channel)

When a customized service is ordered the customer will be notified whether Additional Engineering Charges apply. In such cases, the customer will be advised and given the opportunity to change the order.

The following service descriptions provided, specify the characteristics of the basic channel and indicate whether the channel is provided between customer designated premises, between a customer designated premises and GTA's hub where bridging or multiplexing functions are performed, between hubs, or between a customer designated premises.
