

### Items in Box

#### Items in the Box:

Modem

RJ-45 (Ethernet) Cable

RJ-11 (Phone) Cable

AC Adapter

DSL Filter

#### Connect the Modem to the Computer:

ETH port is available for PC or laptop connections. Use RJ-45 Ethernet cable.

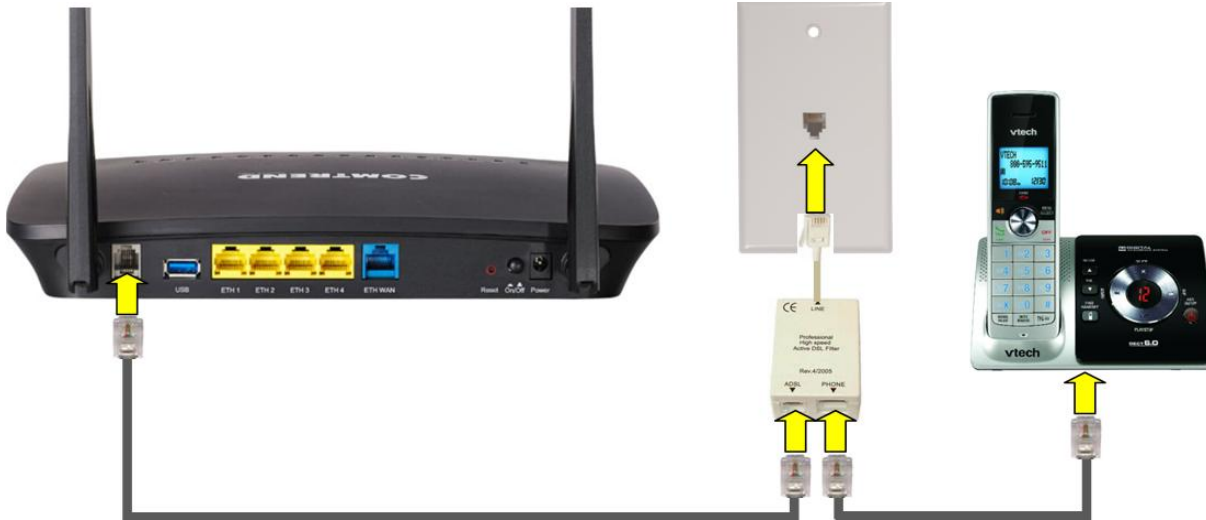

#### Connect the Modem to the Set Top Box(s) (STB):

ETH 2, ETH 3, & ETH 4 ports are available for multiple STB connections. Use RJ-45 Ethernet cable.

#### Connect the modem to the network and phone:

DSL port is available for Phone Line Network. Use RJ-11 Phone cable & ADSL splitter/filter (Recommended).

#### Connect the modem to a power outlet:

Ensure both ends of the AC adapter are securely connected.

#### Power on modem:

After all connections have been made, press the On/Off button inwards. Wait about 10 minutes for all lights in front to sync and for the modem to successfully boot up.
