ENHANCED CENTRAL OFFICE BASED SERVICES

I. MERIDIAN DIGITAL CENTREX (MDC) SERVICE

A. General

Meridian Digital Centrex Service is a central office based service, which provides PBX and key system type features to large and small multiline business customers. Basic operating features include Direct Inward Dialing (DID), Direct Outward Dialing (DOD), Station-to-Station Dialing, Automatic Identified Outward Dialing (AIOD) and Tone Dialing.

1. Meridian Digital Centrex Service is offered in all central offices and is subject to availability of other required facilities.

2. One directory listing is provided without charge for each Meridian Centrex system. Additional directory listings for MDC stations may be provided to the customer at the regular business extra listing rate.

3. Meridian Digital Centrex lines may not terminate as trunks on PBX or be used in association with Public Pay Telephone service.

4. Sufficient floor space and the necessary commercial power wiring and outlets for operation of the service are furnished by the customer who assumes responsibility for the safe condition of such floor space, wiring and outlets.

5. GTA will determine what type of central office configuration is required to conform to GTA standards, including transmission limits. MDC service is available at the rates specified in this tariff for the maximum distance allowed for a station line 10 meet transmission limits. MDC service provided at further distances may include additional charges based on the special service arrangements required.

6. Vacation service does not apply to MDC Service.

7. Circuits to provide connections between an MDC system and systems from other locations are provided primarily for communication between stations of the two systems. Centrex stations may be terminated at different premises of the same customer, provided they meet transmission requirements. Appropriate intra-exchange or interexchange private line - charges may apply to off-premises Centrex station lines that terminate in the host exchange or in an exchange other than the serving exchange.
ENHANCED CENTRAL OFFICE BASED SERVICES

I. MERIDIAN DIGITAL CENTREX (MDC) SERVICE (cont’d)

A. General (cont’d)

8. MDC Service supports various station sets and attendant consoles. Station equipment located to the customer side of the demarcation point for each station line is customer provided.

B. Service Arrangements

1. The MDC Service rate structure includes these functional elements:
   a. Monthly subscription fee for the Grade I, standard feature package selected.
   b. Monthly subscription station line rate, if applicable, for the grade and feature package selected.
   c. Charges for optional features.
   d. Applicable Nonrecurring Charges.

2. Meridian Digital Centrex Service is arranged in three package groupings.
   Grades I, II, and III.

   The Grade I MDC grouping consists of three feature packages, and is designed for small systems with fewer than 70 stations. The Grade II grouping, consisting of three packages, is designed for larger systems in the range of 71-1,000 stations. MDC Service for Grade I and Grade II Service includes specific feature set packages, described below, as a part of each offering. MDC Grade III Service is a custom offering designed for extremely large systems with over 1,000 stations. Rates for MDC Custom Service are described in paragraph E.9. of this section.

   a. Grade I MDC Centrex Service is available in four packages:
      1) Small Standard - serving 2-15 stations.
      2) Full Standard - serving 16-30 stations.
      3) Premium - serving 31-70 stations.
   b. Grade II MDC Centrex Service is available in three packages:
      1) Standard - serving 71-100 stations.
ENHANCED CENTRAL OFFICE BASED SERVICES

I. MERIDIAN DIGITAL CENTREX (MDC) SERVICE (cont’d)

B. Service Arrangements (cont’d)

2) Premium - serving 101-399 stations.
3) Deluxe - serving 400-1000 stations.

c. Grade III MDC Centrex is a custom offering, available on a specific contract on an individual case basis.

3. A customer may upgrade to another package and pay a Nonrecurring Charge (paragraph E.8.) in addition to applicable Service Charges from Section 3 of the General Exchange Tariff. MDC package upgrades to MDC Grade III Custom Service are available on an individual case basis (ICB).

4. MDC Service will be provided for a one-month or a twelve-month period at the rates provided in paragraph E of this tariff. MDC Service is provided for a minimum of one month, beginning on the service installation date.

   Month-to-Month rates are subject to a GTA initiated rate change while; rates for the 12-month option remain fixed. The 12 month fixed term contract receives a five percent discount on the month-to-month service rate.

   At the conclusion of the 12-month fixed term, the customer must:

   a. Elect to renew MDC Service at the new rates and according to the terms and conditions that exist at the time or renewal; or

   b. Convert to the MDC month-to-month rates; or

   c. Discontinue the service. Termination charges will apply, if a customer discontinues MDC service before the conclusion of a fixed term.
ENHANCED CENTRAL OFFICE BASED SERVICES

I. MERIDIAN DIGITAL CENTREX (MDC) SERVICE (cont’d)

B. Service Arrangements (cont’d)

d. MDC Service may be provided as agreed upon by the subscriber and GTA on a fixed term of a minimum period of twelve (12) months and for twelve (12) month periods thereafter. Customers may cancel the Agreement at the end of the first year or at any successive year only by providing notice of cancellation no less than thirty (30) days prior to the end of the initial term or any successive term.

e. The MDC customer who subscribes to a 12 month fixed term agreement acknowledges that GTA will be damaged by an MDC Customer's early cancellation of an agreement. In the event that an MDC customer cancels the fixed term agreement prior to the end of the initial one (1) year term, an amount equal to the remaining monthly charges is due to GTA under the agreement.

C. Feature Definitions

1. MDC Basic Service

MDC Service Grades I, II and III include the following basic features:

Automatic Identification of Outward Dial - Identifies all calls leaving the customer group by the station number from which calls are placed.
Business Group - A collection of stations having an inter-station Abbreviated dialing plan for station-to-station calling and a common access to the public switched network.

Direct Inward Dialing - Enables a station user to receive local or long Distance calls from outside of the business group without the aid of the attendant.

Direct Outward Dialing - Allows a station user to place local or long distance calls outside of the business group, without the aid of the attendant.

Station-to-Station Calling - Permits the station users of a business group to call each other.

Tone Dialing - Equips all stations for tone dialing.
ENHANCED CENTRAL OFFICE BASED SERVICES

I. MERIDIAN DIGITAL CENTREX (MDC) SERVICE (cont’d)

C. Feature Definitions (cont’d)

2. MDC Package Options

In addition to the basic features described above, Meridian Digital Centrex subscribers receive up to four feature sets and/or optional features (Grade II, Deluxe) depending on the size of their telephone system. The feature sets not included in a particular size package offering and/or any optional features may be added for an additional charge (see Feature Tables in paragraph D. of this Section), but all packages include the basic features. The features included in each set are listed below.

a. Basic Feature Set - All Packages

Call Forwarding - Permits a station user to forward calls that encounter busy and/or no answer conditions, or all calls, to a predefined destination.

Call Hold - Enables a station user to put a call on hold and later retrieve the held call. The station user can place another call while the initial call is on hold.

Call Pickup - Permits a station user to dial a code to answer a call, which is ringing at another station within the call pickup group.

Call Transfer - Allows a station user to transfer a call to another party.

Call Waiting - Alerts a station user, on an existing call, of a third party call attempt.

Directory Number Hunting, Sequential - Activates hunting when any of the directory numbers of the individual lines in the hunt group are called. If that line is busy, hunting will start with that line and continue to the end of the list.
ENHANCED CENTRAL OFFICE BASED SERVICES

I. MERIDIAN DIGITAL CENTREX (MDC) SERVICE (cont’d)

C. Feature Definitions (cont’d)

2. MDC Package Options (cont’d)

a. Basic Feature Set – (cont’d)

**Group Intercom** - Allows a station user abbreviated dialing to other station numbers within the same group.

**Last Number Redial** - Permits a station user to redial the last called number by depressing one or two keys rather than the entire number.

**Multiline Hunting** - Activates hunting when the pilot directory number of a group of individual lines in the hunt group is called. If that line is busy, hunting will start with that line and continue to the end of the list. The pilot directory number is the only number of the hunt group with a directory listing.

**Multiple Appearance Directory Number** - A directory number assigned to more than one business set or single line set. Single call arrangement or multiple call arrangement is available.

**Permanent Hold** - Allows a station user to put an active call on hold and return the handset to the cradle.

**Speed Calling** - Allows a station user to place calls to commonly called destinations by dialing a speed call activation code instead of dialing the complete number.

**Three Way Calling** - Permits a station user who has used the consultation hold feature to put one party on hold, reach a third party, and bring all three parties together in a three-way connection.
ENHANCED CENTRAL OFFICE BASED SERVICES

I. MERIDIAN DIGITAL CENTREX (MDC) SERVICE (cont’d)

C. Feature Definitions (cont’d)

2. MDC Package Options (cont’d)

b. Enhanced Feature Set - Grade I Premium Package
   Grade II All Packages

   Call Park - Allows a station user to park one call against the user's own
directory number and then make or receive calls on that directory
number.

   Direct Inward System Access - Enables a member of the business
group to call into the business location from a remote location, and after
entering a proper authorization code, to make use of the business
facilities.

   Directed Call Pickup - Permits a station user to dial a code to apply
call pickup to groups other than its own.

   Directory Number Hunting, Circular - Permits hunting of all lines in
the hunt group regardless of the start point of hunting to permit hunting
in a circle. This feature requires a hunt group.

   Distinctive Ringing - Permits a station user to determine by the
cadence of the ringing whether a call is from another station or from
someone outside the business group.

   Distributed Line Hunting - Distributes calls to the pilot number
throughout the hunt group to distribute the workload evenly.

   Do Not Disturb - Prevents incoming calls from ringing the station.
Calls may be directed to an attendant, a busy tone or another station.
ENHANCED CENTRAL OFFICE BASED SERVICES

I. MERIDIAN DIGITAL CENTREX (MDC) SERVICE (cont’d)

C. Feature Definitions (cont’d)

2. MDC Package Options (cont’d)

b. Enhanced Feature Set (cont’d)

Group Intercom With Page - Allows a station user abbreviated dialing and paging of other numbers within the group.

Hotline Service - Provides an automatic connection between a station and a predetermined telephone number, when the station goes off-hook.

MDC Operational Measurements - Provides some call detail information for all calls originated from stations within a customer group.

Message Waiting - permits a station user to dial a code to access the person who activated the message waiting feature. Also permits a station to activate Message Waiting or another station.

Off-Hook Queuing - Permits a station user to wait off-hook in queue for an idle trunk to complete a call.

c. Executive Feature Set - Grade II All Packages

Call Back Queuing - Allows a user, encountering a busy condition on all trunks, to be recalled when a trunk becomes idle and to place the call automatically.

Call Waiting Originating - Allows an originating line to impose a call waiting tone automatically on a busy called line.

Dial Call Waiting - Permits a user the discretion of imposing a call waiting tone on a busy station that normally does not have call waiting.
ENHANCED CENTRAL OFFICE BASED SERVICES

I. MERIDIAN DIGITAL CENTREX (MDC) SERVICE (cont’d)

C. Feature Definitions (cont’d)

2. MDC Package Options (cont’d)

c. Executive Feature Set – Grade II All Packages (cont’d)

Directed Call Park - Provides single line stations with the capability of parking one call against any valid station directory number in the system from where it may be later retrieved by any station.

Executive Busy Override - Allows a station to gain access to a busy station by breaking in on an existing call.

Meet-Me Conference - Allows a station user to establish a conference call consisting of four to thirty conferees without the assistance of the attendant.

Ring Again - Enables a station user to camp-on to a busy station, go off-hook, and be called back when the busy station becomes idle.

d. Restriction and Routing Feature Set - Grade II Premium and Deluxe

Automatic Route Selection - Allows an outgoing call to be completed automatically by the least cost route available.

Code Restrictions - Permits the subscriber to define which NPA or NNX numbers stations may be restricted from dialing. Three through ten digit numbers can be restricted.
ENHANCED CENTRAL OFFICE BASED SERVICES

I. MERIDIAN DIGITAL CENTREX (MDC) SERVICE (cont'd)

C. Feature Definitions (cont'd)

2. MDC Package Options (cont'd)

c. Datapath Service - Grade II Premium and Deluxe

Provides the customer access to features to provide switched data transmission capabilities. Datapath technology provides high quality, high-speed, dial-up digital data transmission capabilities for both synchronous and asynchronous signaling at speeds greater than analog modems. The transmission limit for Datapath Service is 14,000 feet from the central office for a customer who is served by all 26-gauge cable in the loop and 18,000 feet from the central office for a customer who is served by 22 and/or 24-gauge cable in the loop.

A customer that subscribes to Datapath Service is required to provide a Meridian Data Unit (MDU), located at the customer's premises, which interacts with GTA's Data Unit equipment in the central office. The customer's MDU is considered customer premises equipment (CPE); therefore, the installation, repair, and maintenance of the customer's MDU is the responsibility of the customer.

Datapath Service provides the following additional features for the Meridian Data Unit in conjunction with MDC Centrex service: Keyboard Dialing; Ring Again; Speed Calling; Automatic Dial; and Automatic Line.
ENHANCED CENTRAL OFFICE BASED SERVICES

C. Feature Definitions (cont’d)

3. Optional MDC Features - MDC Grade II Deluxe customers may receive any combination* of the additional features below as a part of their package. In addition, MDC Grade I (all classes) and Grade II (Standard and Premium) customers may order the features below on an individual case basis (ICB) as shown in paragraph E.4. of this section. GTA marketing representatives will provide the customer with detailed descriptions of each optional feature upon request.

- Automatic Call Distribution (ACD) System Set
- ACD - Management Information System
- ACD - Remote Load Management
- Business Set
- Auto Answer Back
- Automatic Dial
- Call Back Queuing
- Call Forwarding
- Call Park
- Call Pickup
- Call Waiting
- Controlled Conference
- Directed Call Park
- Directed Call Pickup, Barge-In
- Display
- Group Intercom
- Intercom
- Key Short Hunt
- Last Number Redial
- Make Busy
- Malicious Call Hold
- Message Waiting
- Ring Again
- Speed Calling
- Subscriber Line Usage
- Three-Way Conference/Call Transfer

* Excluding Station Message Detail Recording (SMDR). SMDR is only available on an individual case basis.

(1) Service Charges are applicable as provided in Section 3 of the General Exchange Tariff.

9. MDC Grade III - Custom Centrex Service

a. When Grade III MDC Custom Centrex Service is provided to a specific customer requesting more than 1000 MDC Centrex station lines, the Company will file customer specific tariff sheets and customer specific rates to be inserted in its General Exchange tariff. The customer specific tariff sheets shall include the following provisions:

i. Customer name;
ii. Customer address;
iii. The number of MDC stations;
iv. Terms and conditions of the fixed term contract including payment option and interest used in the payment plan, and
v. Applicable rates by rate element.

b. Rates for Grade III MDC Custom Centrex Service arrangements will be determined on an individual case basis and will vary with each arrangement.

F. Agency Sales

Meridian Digital Centrex Service may be made available to customers through authorized agents of GTA. Authorized agents of GTA are those firms, companies or individual who have entered into a contractual arrangement with GTA for the purpose of offering MDC Services to customers within GTA’s operating territory. The rates, rules and regulations in Section 7 of this Tariff shall apply regardless of whether a customer negotiated with GTA or an Agent of GTA.
